

# NUDURA Project Profile

Augustus Plaza - Fort Worth, Texas

## FAST FACTS

- ICFs used for all interior and exterior walls, elevator shafts, and stairwells
- One of the first ICF structures to use polished stone exterior finish
- Stone panels were precut, so dimensions had to be accurate
- “Pop-out” angled entrance supported on narrow column
- Number and width of windows made for a complicated build
- Used as tour location for many regional architects
- Web Publicity includes YouTube videos
